EAER Ordinance on Organic Farming

of 22 September 1997 (Status as of 1 January 2020)

The Federal Department of Economic Affairs, Education and Research (EAER)¹, on the basis of Articles 11 paragraph 2, 12 paragraph 2, 13 paragraph 3^{bis}, 15 paragraph 2, 16a paragraphs 1–4, 16h, 16k paragraphs 1 and 2^{bis}, 16n paragraph 1, 17 paragraph 2, 23 paragraph 1, 23a paragraph 1, 30d paragraph 3 and 33a paragraph 3 of the Organic Farming Ordinance of 22 September 1997², in agreement with the Federal Department of Home Affairs (FDFA),³ ordains:

Section 1 General Provisions⁴

Art. 1⁵ Plant protection products

The plant protection products authorised for uses in organic farming and the special directions for their use are laid down in Annex 1.

Art. 2 Fertilisers⁶

The fertilisers and equivalent products laid down in Annex 2 shall be authorised in organic farming.

AS 1997 2519

¹ The name of this administrative unit was amended in application of Art. 16 para. 3 of the Publication Ordinance of 17 Nov. 2004 (AS 2004 4937) on 1 Jan. 2013. This amendment has been made throughout the text.

² SR 910.18

³ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁴ Inserted by No I of the EAER O of 7 Nov. 2001, in force since 1 Jan. 2002 (AS 2002 228).

⁵ Amended by No I of the EAER O of 1 Sept. 2016, in force since 1 Oct. 2016 (AS 2016 3183).

⁶ Term in accordance with No I of the EAER O of 13 March 2001, in force since 1 April 2001 (AS 2001 1322). This amendment has been made throughout the text.

Art. 37 Use of products and substances under Article 16j paragraph 2 letter b and c of the Organic Farming Ordinance in processing foodstuffs

¹ The following may be used for processing foodstuffs, with the exception of yeast and wine:⁸

- a.⁹ products and substances laid down in Annex 3;
- b. preparations made from micro-organisms and enzymes, which are normally used in the production of foodstuffs; enzymes, which are to be used as food additives, must be listed in Annex 3 Section A;
- c.¹⁰ Products and substances laid down in Article 2 paragraph 1 letter b and c of the FDHA Flavourings Ordinance of 16 December 2016¹¹ which are listed as «natural flavouring substances» or «flavouring preparations» under Article 10 of the Flavourings Ordinance;
- d. drinking water and salts (mainly of sodium or potassium chloride), which are generally used in food processing;
- e.¹² minerals, including trace elements, vitamins, amino acids and other micro-nutrients:
 - 1. in foodstuffs, provided their use is required when placing products on the market in accordance with the foodstuffs legislation, with the exception of dietary supplements under the FDHA Ordinance of 16 December 2016¹³ on Dietary Supplements,
 - 2. in foodstuffs intended for persons with special dietary requirements in accordance with Article 2 letters a–c of the FDHA Ordinance of 16 December 2016¹⁴ on Foodstuffs for Persons with Special Dietary Requirements (SDRO), provided their use is permitted under the SDRO.

² For the assessment for the purposes of Article 18 paragraph 1 letter b of the Organic Farming Ordinance:

- a. food additives laid down in Annex 3 Section A, which are marked with an asterisk in the column for the additive code, shall be included as ingredients of agricultural origin;

⁷ Amended by No I of the EAER O of 18 Nov. 2009, in force since 1 Jan. 2010 (AS 2009 6337).

⁸ Amended by No I of the EAER O of 31 Oct. 2012, in force since 1 Jan. 2013 (AS 2012 6357).

⁹ Amended by No I of the EAER O of 31 Oct. 2012, in force since 1 Jan. 2013 (AS 2012 6357).

¹⁰ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

¹¹ SR 817.022.41

¹² Amended by No I of the EAER O of 23 Oct. 2019, in force since 1 Jan. 2020 (AS 2019 3591).

¹³ SR 817.022.14

¹⁴ SR 817.022.104

- b. preparations and substances laid down in paragraph 1 (b–e) and substances laid down in Annex 3 Section A, which are not marked with an asterisk in the column for the additive code, shall not be included as ingredients of agricultural origin.

³ This applies without prejudice to the provisions of the legislation on foodstuffs.

Art. 3a¹⁵ Use of products and substances under Article 16j paragraph 2 letter b and c of the Organic Farming Ordinance in the processing of yeast

¹ The following substances may be used for the production, preparation and formulation of organic yeast:¹⁶

- a.¹⁷ substances laid down in Annex 3a;
- b. products and substances laid down in Article 3 paragraph 1 letter b and d.

² The addition of up to 5 per cent of non-organic yeast extract or autolysed yeast, calculated as dry mass, shall be permitted for the production of organic yeast, if it can be proved that no organically produced yeast extract or autolysed yeast is available.

Art. 3b¹⁸ Use of products and substances in accordance with Article 16j paragraph 2 letter b and c of the Organic Farming Ordinance in the production of wine

Products and substances laid down in Annex 3b may be used for the production of wine.

Art. 3c¹⁹ Oenological practices and processes

¹ Oenological practices and processes shall be permitted if they are authorised under Annex 9 of the FDHA Ordinance of 16 December 2016²⁰ on Beverages and if the substances used are authorised under Annex 3b.

² The use of the following oenological practices and processes shall be permitted only under the following conditions:

- a. In the case of thermal processes in accordance with Annex 9 paragraph 2 of the FDHA Ordinance on Beverages, the temperature must not exceed 70°C.

¹⁵ Inserted by No I of the EAER O of 18 Nov. 2009, in force since 1 Jan. 2010 (AS 2009 6337).

¹⁶ Amended by No I of the EAER O of 31 Oct. 2012, in force since 1 Jan. 2013 (AS 2012 6357).

¹⁷ Amended by No I of the EAER O of 31 Oct. 2012, in force since 1 Jan. 2013 (AS 2012 6357).

¹⁸ Inserted by No I of the EAER O of 31 Oct. 2012 (AS 2012 6357). Amended by No I of the EAER O of 31 Oct. 2018, in force since 1 Jan. 2019 (AS 2018 4367).

¹⁹ Inserted by No I of the EAER O of 31 Oct. 2012 (AS 2012 6357). Amended by No I of the EAER O of 31 Oct. 2018, in force since 1 Jan. 2019 (AS 2018 4367).

²⁰ SR 817.022.12

- b. In the case of centrifugation and filtration, with or without inert filtration aids, in accordance with Annex 9 paragraph 3 of the FDHA Ordinance on Beverages, the pore size must not be smaller than 0.2 micrometres.
- ³ The use of the following oenological practices and processes shall be prohibited:
- a. partial cold concentration in accordance with Annex 9 paragraph 14 letter B number 1 letter c of the FDHA Ordinance on Beverages;
 - b. physical process of desulphisation in accordance with Annex 9 paragraph 8 of the FDHA Ordinance on Beverages;
 - c. electro dialysis process for tartrate stabilisation of the wine in accordance with Annex 9 paragraph 3 of the FDHA Ordinance on Beverages;
 - d. partial dealcoholisation of wine in accordance with Annex 9 paragraph 37 of the FDHA Ordinance on Beverages;
 - e. cation exchange process for tartrate stabilisation of the wine in accordance with Annex 9 paragraph 40 of the FDHA Ordinance on Beverages
- ⁴ Oenological practices and processes which are authorised after 1 January 2014 shall only be used if they have been included in Annex 3b Section B of this Ordinance.

Art. 4 List of countries

Organic products from countries listed in Annex 4 with relevant specifications may be marketed with the labelling relating to organic farming.

Art. 4a²¹ List of recognised certification bodies and inspection authorities outside the list of countries

The certification bodies and inspection authorities recognised under Article 23a of the Organic Farming Ordinance are listed in Annex 4a.

Art. 4a^{bis 22} Species-related requirements for organic stockfarming

¹ The provisions laid down in Annex 5 apply with regard to the species-related requirements for organic stockfarming.

² The requirements regarding outdoor runs and outdoor climate areas together with other rules for housing the various livestock species are laid down in Annex 6.

²¹ Inserted by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

²² Originally Art. 4a. Inserted by No I of the EAER O of 23 Aug. 2000, in force since 1 Jan. 2001 (AS 2000 2508).

Art. 4a^{ter}²³ Prohibited animal feed additives, technical aids and processing methods

1 The following animal feed additives and technical aids shall be prohibited:

- a. genetically modified organisms (GMO);
- b. antimicrobial growth promoters;
- c. additives to prevent coccidiosis and and histomoniasis;
- d. amino acids and their salts and similar products;
- e. non-protein nitrogen compounds (NPN-compounds);
- f. substances and production methods which could be misleading with regard to the actual quality of the product.

² Where no natural sources are available, chemically synthesised additives which are essential for a required ration composition shall be permitted.

³ Extraction with organic solvents except for ethanol, hydrogenation and refining by a chemical process shall be prohibited.

Art. 4b²⁴ Use of animal feed materials and animal feed additives

1 Only the following shall be used in the processing of organic animal feedingstuffs and in the feeding of animals which are kept in accordance with the requirements of this Ordinance:

- a. organic animal feed materials;
- b. animal feed materials and animal feed additives in accordance with Annex 7 Section A 1 and Section B;
- c. non-organic animal feed materials in accordance with Annex 7 Section A 2, provided they were not manufactured or prepared with chemical solvents;
- d. non-organic spices, herbs and molasses provided that:
 1. they are not available in organic form,
 2. they were produced or prepared without chemical solvents, and
 3. their use is limited to 1 per cent of the feed ration of a particular species, calculated annually as a percentage of the dry matter of the feedingstuff of agricultural origin;
- e. organic animal feed materials of animal origin;
- f. sustainable fishery products, provided that:
 1. they were produced or prepared without chemical solvents,
 2. their use is restricted to non-plant-eaters, and

²³ Originally Art. 4a^{bis}. Inserted by No I of the EAER O of 31 Oct. 2012, in force since 1 Jan. 2013 (AS 2012 6357).

²⁴ Inserted by No I of the EAER O of 23 Aug. 2000 (AS 2000 2508). Amended by No I of the EAER O of 31 Oct. 2012, in force since 1 Jan. 2013 (AS 2012 6357).

3. the use of fish protein hydrolysate is restricted to young animals;

g. salt in the form of sea salt or raw rock salt.

² This applies without prejudice to the provisions of the Ordinance on Animal Feeding stuffs of 26 October 2011²⁵.

Art. 4c²⁶ Cleaning agents and disinfectants

The cleaning agents and disinfectants laid down in Annex 8 shall be authorised for use in organic stockfarming.

Art. 4d²⁷

Art. 4e²⁸ Transmission of data by the certification bodies

¹ Data concerning the previous year shall be transmitted to the Federal Office for Agriculture (FOAG) by 31 January each year.

² The certification bodies must use the standard forms laid down in Annex 12 of this Ordinance for transmission of the annual report data referred to in Article 30d paragraph 3 of the Organic Farming Ordinance. The competent cantonal food inspection agency may ask the certification bodies for the annual report on the operators in its canton.

Section 2²⁹

Provisions relating to Beekeeping and Beekeeping Products

Art. 5 Agricultural land

Beekeeping holdings may label their products as organic products even if they have no agricultural land.

Art. 6 Principle of total organic production

¹ When an operator runs several apiaries in the same area, all the units must comply with the requirements of this Ordinance.

²⁵ SR 916.307

²⁶ Inserted by No I of the EAER O of 23 Aug. 2000, in force since 1 Jan. 2001 (AS 2000 2508).

²⁷ Inserted by No I of the EAER O of 18 Nov. 2009 (AS 2009 6337). Repealed by No I of the EAER O of 27 Oct. 2010, with effect from 1 Jan. 2011 (AS 2010 5863).

²⁸ Inserted by No I of the EAER O of 29 Oct. 2014, in force since 1 Jan. 2015 (AS 2014 3979).

²⁹ Inserted by No I of the EAER O of 7 Nov. 2001, in force since 1 Jan. 2002 (AS 2002 228).

² Individual apiaries may be kept on sites which do not comply with the requirements laid down in Article 10, provided that the other provisions are fulfilled. Their products may not be labelled as organic products.

Art. 7 Conversion

¹ Beekeeping holdings which have converted to organic production may label their products as organic products no earlier than one year after conversion. Marketing with reference to being under conversion to organic farming is not permitted.

² During the conversion period the wax must be replaced according to the requirements laid down in Article 16.

Art. 8 Origin of the bees

¹ In the choice of breeds, account must be taken of the capacity of animals to adapt to local conditions, their vitality and their resistance to disease. Preference shall be given to the use of European breeds of *Apis mellifera* and their local ecotypes.

² For the renovation of the apiaries 10 per cent per year of the queen bees and swarms not complying with this Ordinance can be incorporated into the organic-production unit provided that the queen bees and swarms are placed in hives with combs or comb foundations coming from organic-production units. In this case, the conversion period does not apply.

^{2bis} For performance testing under Article 4 of the Ordinance of 14 November 2007³⁰ on Animal Husbandry bees which do not originate from organic holdings may be kept on an organic holding provided they are placed in hives with combs or comb foundations coming from organic production units. In this case, the conversion period does not apply.³¹

³ In case of high mortality of animals caused by health or catastrophic circumstances, with the prior written agreement of the certification body, an apiary may be reconstituted by the acquisition of conventional colonies, when colonies which comply with the provisions of this Ordinance are not available; in this case the conversion period of one year applies.³²

Art. 9 Siting of the apiaries

The siting of the apiaries must:

- a. be such that, within a radius of 3 km from the apiary site, nectar and pollen sources consist essentially of organically produced crops and/or spontaneous vegetation according to Chapter 2 of the Organic Farming Ordinance, and crops not subject to the provisions of this Ordinance, but treated with agricultural production methods complying with the ecological requirements of

³⁰ SR **916.310**

³¹ Inserted by No I of the EAER O of 27 Oct. 2010, in force since 1 Jan. 2011 (AS **2010** 5863).

³² Inserted by No I of the EAER O of 10 Nov. 2004, in force since 1 Jan. 2005 (AS **2004** 4895).

the Confederation and which cannot significantly affect the qualification of beekeeping production as being organic;

- b.³³ maintain enough distance from any non-agricultural production sources possibly leading to contamination, for example urban centres, motorways, industrial areas, waste dumps, waste incinerators etc. The certification body shall establish measures to ensure this requirement. The requirements of this letter do not apply to areas where flowering is not taking place or when the hives are dormant;
- c. ensure enough natural nectar, honeydew and pollen sources for bees and access to water.

Art. 10 Site register

¹ The operator must provide the certification body with a map on an appropriate scale on which are entered the location of hives with details of the site (field, plot of land), swarming time, number in colony, storage for products, and if necessary the locations where certain processing and/or packaging processes take place. Where the Department does not identify any areas or regions under Article 16*h* paragraph 3 of the Organic Farming Ordinance, the operator must provide the certification body with appropriate documentation and evidence, including suitable analyses if necessary, that the areas accessible to his colonies meet the conditions required in this Ordinance.³⁴

² The certification body must be informed of the relocation of hives (e.g. register of movements) within an agreed period.

Art. 11 Colony register

The operator must keep a colony register for each colony. In it the following must be recorded:

- a. location of the hives;
- b. information for identification of the colonies (in accordance with the O of 27 June 1995³⁵ on Livestock Epidemics – stock control of the colonies);
- c. information on artificial feeding;
- d. removal of honey combs and measures for honey extraction.

Art. 12 Feed

¹ At the end of the production season hives must be left with sufficiently abundant reserves of honey and pollen in the brood combs to survive the winter.

³³ Amended by No I of the EAER O of 29 Oct. 2014, in force since 1 Jan. 2015 (AS 2014 3979).

³⁴ Amended by No I of the EAER O of 10 Nov. 2004, in force since 1 Jan 2005 (AS 2004 4895).

³⁵ SR 916.401

² Artificial feeding of colonies is authorised if reserves stored by the colony are insufficient. Organically-produced honey, preferably from the same organic beekeeping unit, shall be used for artificial feeding.

³ With the agreement of the certification body, organically-produced sugar syrup or organically-produced feeding paste can be used instead of organically-produced honey in artificial feeding, in particular when it is required by climatic conditions that provoke crystallisation of honey (e.g. due to formation of melicitose honey).³⁶

⁴ Artificial feeding may be carried out only between the last honey harvest and 15 days before the start of the next nectar or honeydew flow period.

⁵ The following information shall be entered in the register of the apiaries with regard to artificial feeding: type of product, dates, quantities and hives where it is used.

Art. 13 Disease prevention

¹ Disease prevention in beekeeping shall be based on the following principles:

- a. Appropriate hardy breeds must be selected;
- b. Suitable practices encouraging strong resistance to disease and the prevention of infections must be applied, e.g. regular renewal of colonies, systematic inspection of hives to detect any health anomalies, control of male broods, disinfecting of materials and equipment at regular intervals using agents permitted for organic beekeeping under Annex 8, safe disposal of contaminated material or sources, regular renewal of beeswax and sufficient reserves of pollen and honey in hives.

² The use of allopathic chemically synthesised medicinal products for preventive treatments is prohibited.

Art. 14 Veterinary treatment

¹ Colonies which have become sick or infested shall be treated immediately in accordance with the Ordinance on Livestock Epidemics of 27 June 1995³⁷; if necessary they shall be placed in isolation apiaries.

² Only veterinary medicinal products which are authorised by the «Interkantonale Kontrollstelle für Heilmittel» (IKS) (Intercantonal Control Agency for Medicines) shall be used. By way of derogation, formic acid, lactic acid, acetic acid and oxalic acid, and the substances menthol, thymol, eucalyptol and camphor may be used to control *Varroa jacobsoni*.

³ Only phytotherapeutic and homeopathic products shall be used to control disease and infestation, unless the use of these products should prove or is unlikely to be effective to eradicate a disease or infestation which risks destroying colonies.

³⁶ Amended by No I of the EAER O of 10 Nov. 2004, in force since 1 Jan. 2005 (AS 2004 4895).

³⁷ SR 916.401

Treatments using allopathic chemically synthesised medicinal products shall be used only if they are indispensable and are prescribed by a veterinarian.

⁴ If a treatment is applied with allopathic chemically synthesised medicinal products, during such a period, the colonies treated must be placed in isolation apiaries and all the wax must be replaced with wax complying with the conditions laid down in this Ordinance. Subsequently, the conversion period of one year will apply to those colonies. This provision shall not apply in the case of treatment with formic acid, lactic acid, acetic acid and oxalic acid, and with the substances menthol, thymol, eucalyptol and camphor to control *Varroa jacobsoni*.

⁵ Whenever veterinary medicinal products are to be used, the type of product (including the indication of the active pharmacological substance) together with details of the diagnosis, the posology (dosage), the method of administration, the duration of the treatment and the legal withdrawal period must be recorded clearly and declared to the certification body, which must authorise the labelling of the relevant products as organic products.

⁶ In addition the guidelines for control of bee diseases laid down by the Swiss Centre for Bee Research of the Dairy Research Station must be followed.

⁷ This applies without prejudice to veterinary treatments or treatments to hives, combs etc. which are prescribed by law.

Art. 15 Beekeeping practices

¹ The destruction of bees in the combs as a method of harvesting beekeeping products is prohibited.

² Mutilation such as clipping the wings of queen bees is prohibited except for clipping the wings of queen bees for performance testing under Article 4 of the Ordinance of 14 November 2007³⁸ on Animal Husbandry.³⁹

³ The replacement of the queen bees involving the killing of the old queen is permitted. Preference shall be given to natural breeding and reproduction processes. Account shall be taken of the swarming instinct. The use of genetically modified bees is not permitted.⁴⁰

⁴ The practice of destroying the drone brood is permitted only as a means of containing infestation with *Varroa jacobsoni*.

⁵ The use of chemical synthetic repellents is prohibited during honey extraction operations.

⁶ Particular care shall be taken to ensure adequate extraction, processing and storage of beekeeping products. All the measures to comply with this requirement shall be recorded.

³⁸ SR 916.310

³⁹ Amended by No I of the EAER O of 27 Oct. 2010, in force since 1 Jan. 2011 (AS 2010 5863).

⁴⁰ Amended by No I of the EAER O of 27 Oct. 2010, in force since 1 Jan. 2011 (AS 2010 5863).

⁷ The removal of the supers and the honey extraction operations must be entered in the register of the apiary.

Art. 16 Characteristics of hives and materials used in beekeeping

¹ The hives must be made basically of natural materials presenting no risk of contamination to the environment or the beekeeping products.

² With the exception of products to control disease and infestation, only natural substances such as propolis, wax and plant oils may be used in the hives.

³ Beeswax for new frames must come from organic production units. In agreement with the certification body, in particular in the case of new installations or during the conversion period, beeswax not coming from organic production units may be used where organically-produced beeswax is not available.

⁴ The use of combs which contain broods is prohibited for honey extraction.

⁵ For the purposes of protecting materials (frames, hives, combs), in particular from pests, only products listed in Annex 1 are permitted.

⁶ Physical treatments such as steam or direct flame are permitted.

⁷ Only the appropriate substances listed in Annex 8 are permitted for cleaning and disinfecting materials, buildings, equipment, utensils or products used in beekeeping.

Section 2a⁴¹ Certificate of Inspection for Imports

Art. 16a⁴² Administration of access rights to TRACES

¹ The FOAG shall inform the competent authority of the European Commission of those persons to whom it has issued access rights to TRACES and shall co-ordinate with this authority co-operation and contacts in respect of TRACES.

² It shall update access rights when changes occur.

Art. 16b⁴³ Issuing of the certificate of inspection

¹ The certificate of inspection shall be issued by:

- a. the authority or certification body of the producer or processor;
- b. where the last preparation stage is not carried out by the producer or processor themselves but by another operator: the authority or certification body of this operator.

⁴¹ Inserted by No I of the EAER O of 25 Nov. 2002, in force since 1 Jan. 2003 (AS 2002 4292).

⁴² Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁴³ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

² The authority or certification body shall be:

- a. for imports under Article 23 of the Organic Farming Ordinance: the authority or certification body of the country listed in Annex 4 in which the products originate or in which the last preparation stage was carried out;
- b. for imports under Article 23a of the Organic Farming Ordinance: the authority or certification body of the exporter in the country of origin or in the country in which the last preparation stage was carried out.

³ Before issuing the certificate of inspection, the authority or certification body shall:

- a. have checked all inspection documents and transport and commercial documents relating to the product in question;
- b. depending on its risk assessment, if necessary have made a physical check of the consignment concerned;
- c. have made sure that in the case of processed foodstuffs from countries under Article 23 of the Organic Farming Ordinance, all organic ingredients of the product have been certified by a certification body which is also recognised for the relevant third country;
- d. have made sure that in the case of processed foodstuffs which are certified by a body under Article 23a of the Organic Farming Ordinance, all organic ingredients have been certified by a certification body in accordance with Article 23 or 23a or by a certification body authorised in Switzerland;
- e. where the last preparation stage and the processing which gives the product its essential character are carried out by different operators:
 1. have carried out a thorough check of all relevant inspection documents,
 2. have made sure that the product has been checked by an accredited authority or certification body in accordance with Article 23 or 23a of the Organic Farming Ordinance, and
 3. if necessary, based on its risk assessment, have carried out a physical check of the goods.

⁴ The authority or certification body shall complete the declaration in box 18 of the certificate of inspection certifying that the product concerned has been produced in accordance with the provisions of the Organic Farming Ordinance or of the EC Regulation No 834/2007⁴⁴.

Art. 16c Requirements for the certificate of inspection

¹ The certificate of inspection must be drawn up in accordance with the provisions laid down in Annex 9 Section A or with the model in Annex V of Commission

⁴⁴ Council Regulation (EC) No 834/2007 of 28 June 2007 on organic production and labelling of organic products and repealing Regulation (EEC) No 2092/91, OJ. L 189 of 20.7.2007, p. 1; last amended by Regulation (EU) No 517/2013, OJ. L 158 of 10.6.2013, p. 1.

Regulation (EC) No 1235/2008⁴⁵. It shall be drawn up in German, French, Italian or English.⁴⁶

² Subsequent alterations must be certified by the issuing authority or certification body.

³ The certificate of inspection shall be made in one single original. The first consignee or the importer may make a copy for the purpose of informing the certification body. Each copy shall carry the indication «COPY» or «DUPLICATE» printed on it.

⁴ The following shall be considered to be the original of the certificate of inspection:

- a. the printed copy signed by hand of the certificate completed in TRACES; or
- b.⁴⁷ a certificate of inspection which bears:
 1. an advanced electronic signature in accordance with Article 2 letter b of the Federal Act of 18 March 2016⁴⁸ on Electronic Signature, or
 2. a qualified electronic seal in accordance with Article 3 number 27 of Regulation (EU) 910/2014^{49,50}

⁵ If the original of the certificate of inspection is a printed copy signed by hand of the certificate completed in TRACES, the authority or certification body in the third country, the certification body which carries out the check in accordance with Article 16*d* and the first receiver in each phase of issuing and provision of the certificate of inspection shall check by means of a stamp and its presentation whether the signed copy matches the information in TRACES.⁵¹

Art. 16*d*⁵² Verification of the certificate of inspection and the consignment

¹ For each consignment, the importer must submit the certificate of inspection to his certification body. He may only market or prepare the consignment if the certification body has verified the consignment and has completed box 20 of the certificate of inspection. Verification of the consignment by the certification body consists of a

⁴⁵ Commission Regulation (EC) No 1235/2008 of 8 December 2008 laying down detailed rules for implementation of Council Regulation (EC) No 834/2007 as regards the arrangements for imports of organic products from third countries, OJ. L 334 of 12.12.2008, p. 25; last amended by Implementing Regulation (EU) 2017/1473, OJ. L 210 of 15.8.2017, p. 4.

⁴⁶ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁴⁷ Amended by No I of the EAER O of 23 Oct. 2019, in force since 1 Jan. 2020 (AS 2019 3591).

⁴⁸ SR 943.03

⁴⁹ Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC, OJ. L 257 of 28.8.2014, p. 73.

⁵⁰ Inserted by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁵¹ Inserted by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁵² Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

systematic documentary check, spot identity checks to establish whether the information in the accompanying documents matches the consignment, and physical checks of the goods based on a risk assessment.

² Every person who has access to TRACES must immediately inform the competent authority via TRACES of any irregularities and infringements.

³ The first consignee shall, on receipt of the consignment, complete the declaration in box 21 of the certificate of inspection certifying that receipt of the consignment has been carried out in accordance with Annex 1 Number 8.5 of the Organic Farming Ordinance. The first consignee shall then send the original to the importer mentioned in box 11 of the certificate of inspection. The importer shall keep the certificate of inspection for not less than two years.

Art. 16e⁵³ Preparation of a consignment before customs clearance

Where a consignment is intended to be submitted before customs clearance to one or more forms of preparation as defined in Article 4 letter c of the Organic Farming Ordinance, the procedure laid down in Article 16d paragraph 1 must be completed before the first preparation is carried out.

The customs declaration reference number for customs warehousing or inward processing must be given in box 19 of the certificate of inspection.

Art. 16f Splitting of a consignment before customs clearance

¹ Where it is intended to split a consignment into different batches before customs clearance, the procedure laid down in Article 16d paragraph 1 must be completed before the splitting is carried out.

² For each of the batches which results from the splitting, the importer shall also provide the certification body with an extract of the certificate of inspection via TRACES.⁵⁴

³ The extract of the certificate of inspection must be drawn up in accordance with the provisions laid down in Annex 9 Section B.⁵⁵

⁴ The competent certification body of the importer shall complete the declaration in box 13 certifying that the extract of the certificate of inspection corresponds to the certificate of inspection mentioned in box 3.⁵⁶

⁵ A copy of each extract of the certificate of inspection shall be kept together with the original certificate of inspection by the importer. The copy shall carry the indication «COPY» or «DUPLICATE» printed on it.

⁵³ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁵⁴ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁵⁵ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁵⁶ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

6 ...⁵⁷

⁷ On receipt of a batch, the consignee of the batch shall complete the declaration in box 14 of the extract of the certificate of inspection certifying that the receipt of the batch has been carried out in accordance with Annex 1 Number 8.5 of the Organic Farming Ordinance. The consignee shall keep the extract of the certificate of inspection for not less than two years.⁵⁸

Section 2^b⁵⁹ **Information System for Organic Seeds and Plant Propagating Material**

Art. 16g Entry in the information system

¹ Varieties from which organic seeds or plant propagating material are available shall be entered in the information system for organic seeds and plant propagating material on application by the supplier.

² Conditions for entry shall be that the supplier:

- a. provides evidence that he or, if the supplier only deals with pre-packaged seeds or plant propagating material, the most recent operator, has undergone the inspection procedure laid down in Chapter 5 of the Organic Farming Ordinance;
- b. provides evidence that the seeds or plant propagating material to be marketed meet the general requirements for seeds and plant propagating material;
- c. undertakes to provide access to all the information required under Article 16*h* and to update this information at the request of the operator of the information system or whenever necessary;
- d. undertakes to notify the operator of the information system without delay if one of the registered varieties is no longer available.

³ The operator of the information system may remove an entry if the supplier fails to meet the conditions laid down in paragraph 2.

Art. 16*h* Information entered

Each entry must contain at least the following information:

- a. the scientific name of the species and the varietal description;
- b. the name and contact details of the supplier or his representative;
- c. the area within which the supplier is able to deliver the seeds or plant propagating material to the user in the normally required time;

⁵⁷ Repealed by No I of the EAER O of 18 Oct. 2017, with effect from 1 Jan. 2018 (AS 2017 6349).

⁵⁸ Amended by No I of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

⁵⁹ Inserted by No I of the EAER O of 26 Nov. 2003, in force since 1 Jan. 2004 (AS 2003 5357).

- d. the country or region in which the variety was tested and authorised for the catalogue of varieties;
- e. the date from which the seeds or plant propagating material are available;
- f. the name and/or code number of the inspection authority or body responsible for inspection of the operator.

Art. 16i List of seeds and plant propagating material available in sufficient quantities

Annex 10 contains the list of species or sub-species of which there are sufficient quantities of organically produced seeds and plant propagating material and an almost sufficient number of organically produced varieties in Switzerland. This list must be held in the information system.

Art. 16j Access to the data

The data in the information system must be accessible to users of seeds or plant propagating material and to the general public via the Internet.

Art. 16k Annual report

¹ The operator of the information system must record all notifications made under Article 13a paragraph 3 of the Ordinance of 22 September 1997 and must pass on the related information to the FOAG in an annual report.

² For each species for which documentary evidence is requested under Article 16k paragraph 1 the report must contain the following information:

- a. the scientific name of the species, the sub-species and the varietal description;
- b. the total number of notifications made;
- c. the total quantity of non-organic seeds or plant propagating material which has been used by those requesting documentary evidence;
- d. the chemical treatment carried out for reasons of plant health in accordance with Article 13a paragraph 6 of the Organic Farming Ordinance.

Section 3⁶⁰ Final Provisions**Art. 17⁶¹****Art. 18⁶²** Entry into force

This Ordinance shall enter into force on 1 January 1998.

Transitional provisions to the Amendment of 2 November 2006⁶³

Until 31 December 2007 organic produce may still be produced and delivered according to the present provisions of Annex 3 subparagraphs A and B. Stock existing on 31 December 2007 may still be delivered until depleted.

Transitional provisions to the Amendment of 1 December 2011⁶⁴**Transitional provisions to the Amendment of 31 October 2012⁶⁵**

¹ If feedingstuffs have to be purchased for non-ruminants to supplement the holding's own feed stocks and if sufficient quantities of organic feedingstuffs are not available, non-organic protein feed may be purchased with the agreement of the certification body by 31 December 2015. The proportion of non-organically produced protein feed, as a ratio of dry matter, may total no more than 5 per cent per year of the total feed consumption for pigs and poultry. Animal feed materials in accordance with Annex 7 Section A 2 shall be deemed to be protein feed.

² Feedingstuffs may be manufactured under existing legislation by 31 December 2014.

³ Existing stocks of animal feedingstuffs on 1 January 2015, which have been manufactured in accordance with existing legislation, may continue to be sold until stocks run out or may be fed to animals until the expiry date.

⁴ The time limit given in paragraph 1 shall be extended by 31 December 2018.⁶⁶

⁶⁰ Inserted by No I of the EAER O of 7 Nov. 2001, in force since 1 Jan. 2002 (AS 2002 228).

⁶¹ Repealed by No V 16 of the O of 22 Aug. 2007 on the Formal Revision of Federal Legislation, with effect from 1 Jan. 2008 (AS 2007 4477).

⁶² Formerly Art. 5.

⁶³ AS 2006 5165

⁶⁴ AS 2011 5975. Repealed by No I of the EAER O of 31 Oct. 2012, with effect from 1 Jan. 2013 (AS 2012 6357).

⁶⁵ AS 2012 6357

⁶⁶ Inserted by No I of the EAER O of 28 Oct. 2015, in force since 1 Jan. 2016 (AS 2015 4519).

⁵ The time limit given in paragraph 4 shall be extended by 31 December 2020.⁶⁷

⁶ The time limit given in paragraph 5 shall be extended by 31 December 2022.⁶⁸

Transitional provisions of the Amendment of 1 September 2016⁶⁹

¹ The following may be used for the production of processed foodstuffs by 31 December 2018:

- a. Lecithins (E 322) laid down in Annex 3 Section A from non-organic raw materials;
- b. Carnauba wax (E 903) laid down in Annex 3 Section A from non-organic raw materials;
- c. Vegetable oils laid down in Annex 3 Section B 1 not produced organically;
- d. Carnauba wax for the preparation of foodstuffs of plant origin laid down in Annex 3 Section B 1 from non-organic raw materials.

² Vegetable oils laid down in Annex 3a not produced organically may be used for the production of yeast and yeast products by 31 December 2018.

³ The time limit given in paragraph 1 shall be extended by 31 December 2019 for the food additives and the technical aids in accordance with paragraph 1 letter b, c and d.⁷⁰

⁶⁷ Inserted by No I of the EAER O of 31 Oct. 2018, in force since 1 Jan. 2019 (AS 2018 4367).

⁶⁸ Inserted by No I of the EAER O of 23 Oct. 2019, in force since 1 Jan. 2020 (AS 2019 3591).

⁶⁹ AS 2016 3183

⁷⁰ Inserted by No I of the EAER O of 31 Oct. 2018, in force since 1 Jan. 2019 (AS 2018 4367).

*Annex I*⁷¹
(Art. 1 and 16 para. 5)

Authorised plant protection products and conditions for use

All listed plant protection products shall be subject to the directions for use laid down in the Ordinance of 12 May 2010⁷² on Plant Protection Products (PPPO). Stricter directions for use for organic production are given in the second column of each table.

1. Substances of plant or animal origin

Name	Description, compositional requirement, conditions for use
Azadirachtin extracted from <i>Azadirachta indica</i> (Neem tree)	
Beeswax	Only as pruning agent/wound protectant.
Raw materials which are listed in Annex 1 Section D of the PPPO and are deemed to be foodstuffs under the Foodstuffs Act of 20 June 2014 ⁷³ (FSA) and are of animal or plant origin	Substances not to be used as herbicides, but only for the control of pests and diseases.
Hydrolysed protein, apart from gelatins	Only as attractant for permitted uses in conjunction with other suitable products contained in this Annex
Laminarin	Only to stimulate immune defence in crops. The seaweed must be organically produced or sustainably harvested.
Lecithins	No genetically modified organisms
Pheromone	Only as insect control using traps or dispensers e.g. confusion technique, marking pheromones
Plant oils such as e.g. mint oil, pine oil, caraway oil, fennel oil	All uses authorised, except herbicide.
Plant waxes	Only as pruning agent/wound protectant.
Pyrethrins obtained from <i>Chrysanthemum cinerariaefolium</i>	
Pyrethroids (only deltamethrin or lambda-cyhalothrin)	Only in traps with specific attractants and only against infestation with <i>Bactrocera oleae</i> and <i>Ceratitis capitata</i> (Wied)
Quassia extract obtained from <i>Quassia amara</i>	Only as insecticide, repellent.

⁷¹ Amended by No III para. 1 of the EAER O of 1 Sept. 2016 (AS 2016 3183). Revised by No II para. 1 of the EAER O of 18 Oct. 2017 (AS 2017 6349), of 31 Oct. 2018 (AS 2018 4367) and No II of the EAER O of 23 Oct. 2019, in force since 1 Jan. 2020 (AS 2019 3591).

⁷² SR 916.161

⁷³ SR 817.0

Name	Description, compositional requirement, conditions for use
Repellents of animal or plant origin	Only on non-edible parts of the crop in the case of the use of sheep's fat only where crop material is not ingested by sheep or goats.
Mustard flour	Only as fungicide

2. Micro-organisms or substances produced by micro-organisms

Name	Description, compositional requirement, conditions for use
Natural micro-organisms including viruses	No genetically modified organisms
Spinosad	

3. Other substances and measures

Name	Description, compositional requirement, conditions for use
Aluminium silicate (Kaolin)	
Calcium hydroxide	
COS-OGA	
Ferric phosphate (iron (III) orthophosphate)	
Ethylene	Only permitted for: <ul style="list-style-type: none"> – for ripening bananas, kiwi fruit and persimmons, – for ripening citrus fruit as part of a strategy to prevent damage by fruit flies, – for flower induction of pineapples, – for prevention of bacteria in potatoes and onions
Fatty acids (Soap preparations)	All uses authorised, except herbicide.
Additives to increase efficacy such as e.g. pine resin oil, liquid paraffin	No synthetic chemical substances
Potassium hydrogen carbonate (aka potassium bicarbonate) (Potassium bicarbonate)	
Lime preparations	Only as pruning agent/wound protectant.
Lime sulphur (calcium polysulfide)	Only as fungicide, insecticide and acaricide
Kieselgur (diatomaceous earth)	
Carbon dioxide	
Copper compounds in the form of copper hydroxide, copper oxychloride, (tribasic) copper sulphate, copper oxide, (Bordeaux mixture)	Annual maximum amount of 4 kg copper metal per ha Viticulture: annual maximum amount of 6 kg copper metal per ha; within 5 consecutive years maximum 20 kg copper metal per ha
Maltodextrin	Only as insecticide and acaricide

Name	Description, compositional requirement, conditions for use
Mechanical control devices such as e.g. crop protection nets, spiral barriers, glue-coated plastic traps, sticky bands	
Natural enemies such as e.g. parasitical hymenoptera, predatory mites, reduviids, gall midges, ladybirds, nematoda	
Liquid paraffin	
Quartz sand	
Rodenticides	Only in traps. Only for pest control in livestock buildings and installations
Sulphur preparations	
Aluminium oxide preparations	

Annex 2⁷⁴
(Art. 2)

Authorised fertilisers, preparations and substrata

Fertilisers and preparations may be identified as bio-dynamic if they have been produced according to the guidelines for bio-dynamic farming.

The provisions of the Fertiliser Ordinance of 10 January 2001⁷⁵ and of the EAER Fertiliser Book Ordinance of 16 November 2007⁷⁶ are reserved.

Indication	Description; requirements concerning composition; directions for use
1. Farm manures	
Dung, liquid manure	
Crop residues, green manure	
Straw, other mulch material	
2. Fertilisers, foreign, not from the farm, and equal products	
2.1. Products of mineral origin	
Soft rock-phosphate*	
Aluminium calcium phosphate*	
Basic slag*	
Crude potassium salts (e.g. kainite, sylvinit)*	
Potassium sulphate containing magnesium salt (patent potassium)*	Obtained from crude potassium salt. Only if soil samples show potassium deficiency.
Potassium sulphate*	Obtained from crude potassium salt. Only if soil samples show potassium deficiency.
Natural calcium carbonate (e.g. chalk, marl, limestone meal, maerl, phosphatic chalk etc.)	
Calcium and magnesium carbonate (e.g. magnesian chalk, magnesian, limestone meal, dolomite etc.)	
Industrial limestone from sugar production (Ricokalk)*	
Magnesium sulphate (e.g. kieserite)*	Only of natural origin.
Calcium chloride solution*	Leaf treatment in case of proven calcium deficiency.

⁷⁴ Amended by No I of the EAER O of 7 Dec. 1998 (AS 1999 292), No I para. 1 of the EAER O of 14 Dec. 2000 (AS 2001 252), Art. 9 of the EFD Fertilisers Book Ordinance of 28 Feb. 2001 (AS 2001 722), No I of the EAER O of 13 March 2001 (AS 2001 1322), Annex 3 of the EFD Fertiliser Book Ordinance of 16 Nov. 2007 (AS 2007 6311), No II para. 1 of the EAER O of 27 Oct. 2010, in force since 1 Jan. 2011 (AS 2010 5863), No II para. 2 of the O of 29 Oct. 2014 (AS 2014 3979), No II para. 1 of the EAER O of 18 Oct. 2017 (AS 2017 6349) and No II of the EAER O of 23 Oct. 2019, in force since 1 Jan. 2020 (AS 2019 3591).

⁷⁵ SR 916.171

⁷⁶ SR 916.171.1

Indication	Description; requirements concerning composition; directions for use
Calcium sulphate (gypsum)	Only of natural origin.
Elementary sulphur*	
Sodium chloride*	Only rock salt.
Prepared clay minerals (e.g. perlite, vermiculite etc.)	
Mineral powders (e.g. quartz powder, basalt powder, aluminium oxide powder etc.)	
2.2. Products of organic or organic/mineral origin	
Dung*	Mixture of animal excrement and plant material (litter). Animal species must be given.
Dried dung and dried poultry droppings*	Animal species must be given.
Compost of animal excrement, including poultry droppings*	Animal species must be given.
Liquid animal excrement (liquid manure, urine)*	Use after controlled fermentation and/or appropriate dilution.
Composted or fermented household waste*	Product obtained from source-separated household waste, which has been submitted to composting or to anaerobic fermentation for biogas production. Only plant and animal household waste. From closed and monitored collection systems. Max. concentration in mg/kg dry matter: cadmium: 0.7; copper: 70; nickel: 25; lead: 45; zinc: 200; mercury: 0.4; chromium (total): 70; chromium (VI): 0**
Peat	Only for plant growing and marsh beds.
Substratum of mushroom cultures	The initial substratum must only consist of substances authorised in this list.
Excrement of worms (worm compost) and insects	
Guano*	Animal species and origin must be given.
Composted or fermented mixtures of vegetable matter and/or animal excrement, which are listed in this Annex.	Submitted to composting or to anaerobic fermentation for biogas production. Not to be used on edible parts of the plant.

Indication	Description; requirements concerning composition; directions for use
The following products or by-products of animal origin*:	
– blood meal***	
– bone meal***	
– meat meal***	
– hoof meal***	
– horn meal***	
– bone black***	
– fish meal	
– feather and hair meal	
– wool	
– fulling hair (felt production)	
– parts of hides (leather meal)	Maximum concentration in mg/kg dry matter of chromium (VI): 0***
– hair and bristles	
– hydrolysed proteins	Not to be used on edible parts of the plant
– milk products	
Products and by-products of plant origin such as e.g.:	
– filter cake of oleaginous fruit	
– cocoa shells	
– malt sprouts	
– coconut fibre and coconut cake	
– vinasse, molasses	
– pomace	
Pot ale and pot ale extract	Of Swiss origin, no ammonia pot ale
Seaweeds and seaweed products*	Only and directly obtained from: a. physical treatments, incl. drying, freezing and grinding; b. extraction with water or acid and/or alkali aqueous solutions; or c. fermentation.
Chitin (polysaccharide obtained from the shell of crustaceans)	Only products from sustainable fisheries
Leonardite (organic sediment with a high content of humic acids)	Only obtained as by-product from mining operations
Organic sediment from inland waters, formed in the absence of oxygen (e.g. sludge)	Only organic sediment obtained as by-product from the inland waters industry or from former inland waters If appropriate, it should be obtained in a way, which has the minimum impact on the aquatic system Only sediments from sources free from any contamination from pesticides, persistent organic pollutants and petrol-like substances Maximum concentration in mg/kg dry matter: cadmium: 0.7; copper: 70; nickel: 25; lead: 45; zinc: 200; mercury: 0.4; chromium (total): 70; chromium (VI):0**
Sawdust and shavings	Of wood not treated chemically.
Bark compost	Of wood not treated chemically.

Indication	Description; requirements concerning composition; directions for use
Wood ash	Of wood not treated chemically, as well as farm ash or with authorisation in accordance with the Ordinance on Fertilisers***
Vegetable carbon***	Only natural wood is permitted as raw material for production

2.3 Trace elements

Trace elements*

2.4. Cultures of micro-organisms for soil treatment

Preparations of micro-organisms (fungi, bacteria)* No genetically modified micro- organisms.

3. Preparations

Plant extracts Extracts of plants like infusion and tea
 Plant broth Liquid after homogenization or separation from plant material immersed in water
 Bio-dynamic preparations

4. Substrata

Substrata Peat percentage max. 70% vol.

5. Substrata for mushroom production

Substrata may be used for mushroom production provided they are composed solely of the following:

- 5.1 Dung and animal excrement
 Dung of equine species may be used provided the holder:
- a. From organic holdings
 - a. uses straw from organic farming.
 - b. meets the directions of livestock feeding.
 - c. grants certification body inspectors the right to control the farming of equine species.
- 5.2 The following substrata which are not from organic holdings, up to 25 per cent of the weight of all substrata components****, provided the same substrata are not available from organic holdings and provided the certification body accepts the requirement:
- Dung Mixture of animal excrement and plant material (litter). Animal species must be given.
- Dried dung and dried poultry droppings Animal species must be given.
- Compost of dung from animal excrement, including poultry dung Animal species must be given.
- Liquid animal excrement (liquid manure, urine) Use after controlled fermentation and/or appropriate dilution.
- 5.3 Other products of agricultural origin (e.g. straw) From organic holdings.

Indication	Description; requirements concerning composition; directions for use
5.4 Peat, wood	Not chemically treated.
5.5 Products of mineral origin	In accordance with Fig. 2.1 of this Annex.
5.6 Water, soil	
* In case of proven need	
** Reference limit	
*** Only products which are authorised according to the ordinance on fertilisers of 10 Jan. 2001 (SR 916.171)	
**** Calculated without covering material, before composting and before adding water	

Annex 377
(Art. 3)

Products and substances for use in production of processed food

Section A Authorised food additives, including carriers

All additives are subject to the application restrictions laid down in the Ordinance on Additives of 25 November 2013⁷⁸.

Indication	Directions for use for the preparation of foodstuffs	
	of plant origin	of animal origin
Sodium hydroxide	For sugar(s) production. For oil production excluding olive oil production	not permitted
Natural gypsum	Only permitted for sugar production	not permitted
Sulphuric acid	Only permitted for sugar production	Only permitted for gelatine production
Hydrochloric acid	not permitted	Only permitted for gelatine production and for regulating the pH-value of the salt bath in the production of Gouda, Edam, Maasdammer, Boerenkaas, Friesian and Leidse Nagelkaas cheeses
Ammonium hydroxide	not permitted	Only permitted for gelatine production
Hydrogen peroxide	not permitted	Only permitted for gelatine production
Carbon dioxide	Permitted	Permitted
Nitrogen	permitted	Permitted
Ethanol	Only permitted as solvent	Only permitted as solvent
Tannic acid	Only permitted as filtration aid	not permitted
Egg white albumen	permitted	not permitted
Casein	permitted	not permitted
Gelatine	permitted	not permitted
Isinglass	permitted	not permitted
Vegetable oils	Greasing, releasing or anti-foaming agent. Only when derived from organic production	Greasing, releasing or anti- foaming agent. Only when derived from organic production
Silicon dioxide as gel or colloidal solution	permitted	not permitted
Activated carbon	permitted	not permitted
Talc	Only permitted in compliance with the specific purity criteria for food additive E 553b	not permitted
Bentonite	Permitted	Only permitted as sticking agent for mead
Cellulose	permitted	Only permitted for gelatine production
Diatomaceous earth	permitted	Only permitted for gelatine production
Perlite	permitted	Only permitted for gelatine production

Indication	Directions for use for the preparation of foodstuffs	
	of plant origin	of animal origin
Hazel-nut shells	permitted	not permitted
Rice flour	permitted	not permitted
Beeswax	Only permitted as anti-caking agent	not permitted
Carnauba wax	Releasing agent. Only when derived from organic raw material. Only permitted as anti-caking agent	not permitted
Acetic acid/vinegar	not permitted	Only when derived from organic production. For fish processing, only from biotechnological source, except if produced by or from GMO
Thiamin hydrochloride	Only for use in processing of fruit wines, including cider and perry	Only for use in processing of mead
Diammonium phosphate	Only for use in processing of fruit wines, including cider and perry	Only for use in processing of mead
Wood fibre	The source of timber should be restricted to certified, sustainably harvested wood. Wood used must not contain toxic components (post-harvest treatment, naturally occurring toxins or toxins from micro-organisms)	The source of timber should be restricted to certified, sustainably harvested wood. Wood used must not contain toxic components (post-harvest treatment, naturally occurring toxins or toxins from micro-organisms)

2. Indirectly used technical aids and other products which may be used in the processing of organically produced ingredients of agricultural origin

Wood, shavings and sawdust from untreated wood	Smoke production for smoking
Glues of natural origin	Sticking labels to cheese bodies
Natural colourings under Article 95 of the FDHA Ordinance of 16 December 2016 ⁸⁰ on Foodstuffs of Animal Origin	Colouring egg shells
Shellac	Coating for eggs

⁸⁰ SR 817.022.108

Calcium and magnesium silicate	Coating for eggs
Ash	Treating cheese rind
Natural animal fats	Coating for eggs
Colourings authorised in the Ordinance on Foodstuffs	Marking of eggs, meat and cheeses

Section C

Ingredients of agricultural origin not produced organically

1. Unprocessed plant products and processing products made from them

1.1. Edible fruits, nuts and seeds

Acorns (*Quercus spp.*)
 Colanuts (*Cola acuminata*)
 Dried raspberries (*Rubus idaeus L.*)
 Dried red currants (*Ribes rubrum*)
 Gooseberries (*Ribes crispum L.*)
 Maracuja (*passion fruit, Passiflora edulis*)

1.2. Edible spices and herbs

Galingale (*Alpinia officinarum*)
 Horseradish seeds (*Armoracia rusticana*)
 Red pepper (*Schinus molle L.*)
 Safflower flowers (*Cartamus tinctoris*)
 Water-cress (*Nasturtium officinale*)

1.3. Miscellaneous

Seaweeds including eel-grass, which may be used for the production of conventional foodstuffs.

2. Plant products

2.1. Fats and oils, refined or unrefined, but not chemically modified, obtained from plants except:

Cocoa (*Theobroma cacao*)
 Coconut (*Cocos nucifera*)
 Olives (*Olea europaea*)
 Sunflowers (*Helianthus annuus*)
 Palms (*Elaeis guineensis*)
 Rape (*Brassica napus, rapa*)
 Safflower (*Cartamus tinctoris*)
 Sesame (*Sesamum indicum*)
 Soya (*Glycine max*)

2.2. Sugar, starch, other products from cereals and bulbs

Fructose

Rice paper

Wafers

Rice starch and corn starch, not chemically modified

2.3. Miscellaneous

Pea proteins (*Pisum ssp.*)

Rum: only from cane-sugar syrup

Kirsch, based on fruit and flavourings under Article 3 paragraph 1 letter c

3. Animal products

Aquatic animals, not from aquaculture, which may be used for the production of conventional foodstuffs.

Gelatine

Whey powder

Natural intestines

*Annex 3a*⁸¹
(Art. 3a)

Substances which may be used for the production of yeast and yeast products

Name	Directions for use	
	Primary yeast	Yeast preparations/formulations
Calcium chloride	permitted	not permitted
Carbon dioxide	permitted	permitted
Citric acid	Only permitted for regulating the pH-value in yeast production	not permitted
Lactic acid	Only permitted for regulating the pH-value in yeast production	not permitted
Nitrogen	permitted	permitted
Oxygen	permitted	permitted
Potato starch	Only permitted for filtering Only from organic production	Only permitted for filtering Only from organic production
Sodium carbonates	Only permitted for regulating the pH-value	Only permitted for regulating the pH-value
Vegetable oils	Only permitted as lubricants, anti-caking agents, or anti-foaming agents	Only permitted as lubricants, anti-caking agents, or anti-foaming agents Only from organic production

⁸¹ Inserted by No III para. 3 of the EAER O of 31 Oct. 2012 (AS 2012 6357). Revised by No III para. 2 of the EAER O of 1 Sept. 2016, in force since 1 Oct. 2016 (AS 2016 3183).

Annex 3b⁸²
(Art. 3b and 3c para. 4)

Products and substances permitted for wine production

Practice and process in accordance with Annex 9 of the FDHA Ordinance of 16 December 2016 ⁸³ on Beverages	Indication of products or substances	Directions for use
No 1:	– Air	
	– Gaseous oxygen	
No 3:	– Perlite	
	– Cellulose	
	– Diatomaceous earth	
No 4:	– Nitrogen	
	– Carbon dioxide	
	– Argon	
No 5, 13 und 19:	– Yeasts ⁽¹⁾	
No 6:	– Diammonium phosphate	
	– Thiamine-dichlorhydrate	
	– Yeast autolysate	Use only as inert filtration aid

82 Inserted by No III para. 3 of the EAER O of 31 Oct. 2012 (AS **2012** 6357). Amended by No II para. 2 of the EAER O of 31 Oct. 2018, in force since 1 Jan. 2019 (AS **2018** 4367).

83 SR **817.022.12**

Practice and process in accordance with Annex 9 of the FDHA Ordinance of 16 December 2016 on Beverages	Indication of products or substances	Directions for use
No 7:	<ul style="list-style-type: none"> - Sulphur dioxide - Potassium disulfite or potassium metabisulfite 	<p>a. The maximum amount of sulphur dioxide for red wine must not exceed 100 mg/l with a residual sugar content of less than 2 g/l.</p> <p>b. The maximum amount of sulphur dioxide for white wine and rosé must not exceed 150 mg/l with a residual sugar content of less than 2 g/l.</p> <p>c. For all other wines, the maximum amount of sulphur dioxide laid down in Annex 9 paragraph 9 of the FDHA Ordinance of 16 December 2016 on Beverages as at 1 May 2017, reduced by 30 mg/l in each case, applies.</p>
No 9:	- Oenological charcoal (activated carbon)	
No 10:	<ul style="list-style-type: none"> - Edible gelatine⁽²⁾ - Protein of plant origin from wheat, peas⁽²⁾ or potatoes⁽²⁾ - Isinglass⁽²⁾ - Yeast protein extracts - Egg albumen⁽²⁾ - Tannins⁽²⁾ - Casein - Potassium caseinate - Silicon dioxide - Bentonite - Pectolytic enzymes - Chitosan obtained from <i>Aspergillus niger</i> - L(+)-tartaric acid - Calcium carbonate - Neutral potassium tartrate - Potassium bicarbonate - Lactic acid bacteria - L-ascorbic acid 	
No 12:		
No 15:		
No 17:		

Practice and process in accordance with Annex 9 of the FDHA Ordinance of 16 December 2016 on Beverages	Indication of products or substances	Directions for use
No 20:	– Nitrogen	
No 21:	– Carbon dioxide	
No 22:	– Citric acid	
No 23:	– Tannins ⁽²⁾	
No 25:	– Metatartric acid	
No 26:	– Gum arabic ⁽²⁾	
No 28:	– Potassium bitartrate	
No 29:	– Cupric citrate	
No 32:	– Yeast mannoproteins	
No 35:	– Pieces of oak wood	
No 36:	– Potassium alginate	
No 41:	– Chitosan obtained from <i>Aspergillus niger</i>	
No 49:	– Inactivated yeast	
No 51:	– Lactic acid	
	– L(+)-tartaric acid	

(1) For the individual yeast strains: if available, obtained from organic raw materials.

(2) If available, obtained from organic raw materials.

*Annex 4*⁸⁴
(Art. 4 and 16b para. 2 let. a)

List of countries

1 Introduction

1.1 Product categories

The product categories shall be identified by the following codes in accordance with Regulation (EC) 1235/2008⁸⁵:

Product categories	
Unprocessed crop products	A
Live animals or unprocessed animal products	B
Aquaculture ¹	C
Processed agricultural products for use as food ¹	D
Processed agricultural products for use as feed	E
Vegetative propagating material and seeds for cultivation	F

¹ In Switzerland not regulated in the Organic Farming Ordinance (Art. 1 paragraph 3 Organic Farming Ordinance).

1.2 Exclusion from recognition of products during the conversion period

Animals and animal products produced during the conversion period shall be excluded from recognition with regard to product categories B and D for all third countries listed in this Annex.

2 Countries

Argentina

1. Product categories:

Product categories	Code
Unprocessed crop products	A

⁸⁴ Amended by No II para. 2 of the EAER O of 18 Oct. 2017 (AS **2017** 6349). Revised by No II para. 1 of the EAER O of 31 Oct. 2018 (AS **2018** 4367) and No II of the EAER O of 23 Oct. 2019, in force since 1 Jan. 2020 (AS **2019** 3591).

⁸⁵ Commission Regulation (EC) No 1235/2008 of 8 December 2008 laying down detailed rules for implementation of Council Regulation (EC) No 834/2007 as regards the arrangements for imports of organic products from third countries, OJ. L 334 of 12.12.2008, Annex IV; last amended by Implementing Regulation (EU) 2017/872, OJ. L 134 of 23.5.2017, p. 6.

Product categories	Code
Live animals or unprocessed animal products	B
Processed agricultural products for use as food ¹	D
Vegetative propagating material and seeds for cultivation	F

¹ Wine, yeast not included

2. Origin:

products of categories A, B and F that have been grown in Argentina and products of category D processed in Argentina with organically grown ingredients that have been grown in Argentina;

3. Production standards:

Ley 25 127 sobre «Producción ecológica, biológica y orgánica»

4. Competent authority:

Servicio Nacional de Sanidad y Calidad Agroalimentaria SENASA,
www.senasa.gov.ar

5. Certification bodies:

Code number	Name	Internet address
AR-BIO-001	Food Safety S.A.	www.foodsafety.com.ar
AR-BIO-002	Instituto Argentino para la Certificación y Promoción de Productos Agropecuarios Orgánicos S.A. (Argencert)	www.argencert.com
AR-BIO-003	Letis S.A.	www.letis.org
AR-BIO-004	Organización Internacional Agropecuaria (OIA)	www.oia.com.ar

6. *Body issuing certificate of inspection:* as specified in Number 5.

7. *Time limit for inclusion:* by 31 December 2022.

Australia

1. Product categories:

Product categories	Code	Limitations
Unprocessed crop products	A	
Processed agricultural products for use as feed ¹	D	Composed essentially of one or more ingredients of plant origin.

Product categories	Code	Limitations
Vegetative propagating material and seeds F for cultivation		
¹ Wine, yeast not included		

2. Origin:

Products of categories A and F that have been grown in Australia and products of category D processed in Australia with organically grown ingredients that have been grown in Australia;

3. Production standards:

National standard for organic and bio-dynamic produce

4. Competent authority:

Department of Agriculture and Water Resources:
www.agriculture.gov.au/export/controlled-goods/organic-bio-dynamic

5. Certification bodies:

Code number	Name	Internet address
AU-BIO-001	Australian Certified Organic Pty Ltd. (ACO)	www.aco.net.au
AU-BIO-003	BIO-Dynamic Research Institute (BDRI)	www.demeter.org.au
AU-BIO-004	NASAA Certified Organic (NCO)	www.nasaa.com.au
AU-BIO-005	Organic Food Chain Pty Ltd. (OFC)	www.organicfoodchain.com.au
AU-BIO-006	AUS-QUAL Pty Ltd.	www.ausqual.com.au

6. *Body issuing certificate of inspection:* as specified in Number 5.

7. *Time limit for inclusion:* by 31 December 2022.

Chile

1. Product categories:

Product category	Code	Limitations
Unprocessed crop products	A	Only products listed in the Mutual Recognition Arrangement on Organic Products of 5 August 2019 ⁸⁶ between Switzerland and Chile
Live animals or unprocessed animal products	B	Only beekeeping products
Processed agricultural products for use as food ¹	D	With the exception of animal products or their processed products.

⁸⁶ The document is available in English at: www.blw.admin.ch > Instrumente > Biolandbau.

Product category	Code	Limitations
Vegetative propagating material and seeds F for cultivation		Only products listed in the Mutual Recognition Arrangement on Organic Products of 5 August 2019 between Switzerland and Chile
1 wine und Hefe nicht eingeschlossen		

2. *Origin:*

Products of categories A and D that have been grown in or imported into Chile:

- a. from Switzerland; or
- b. from a country recognised in accordance with this Annex.

3. *Production standards:*

Law No 20.089 of 17 January 2006 on creating a national certification system for organic agricultural products.

4. *Competent authority:*

Servicio Agrícola y Ganadero (SAG), Ministry of Agriculture, www.sag.cl/ambitos-de-accion/productos-organicos

5. *Certification bodies:*

Code number	Name	Internet address
CL-BIO-001	Ecocert Chile S.A.	www.ecocert.cl
CL-BIO-005	CERES – Certification of Environmental Standards GmbH	www.ceres-cert.com
CL-BIO-010	BIO CERTIFICADORA SERVICIOS LIMITADA	www.bioaudita.cl

6. *Bodies issuing certificates of inspection:* as specified in Number 5.

7. *Time limit for inclusion:* by 31 December 2022.

Costa Rica

1. *Product categories:*

Product categories	Code	Limitations
Unprocessed crop products	A	
Processed agricultural products for use as feed ¹	D	Only processed crop products.
Vegetative propagating material and seeds for cultivation	F	
1 Wine, yeast not included		

2. Origin:

Products of categories A and F that have been grown in Costa-Rica and products of category D processed in Costa-Rica with organically grown ingredients that have been grown in Costa-Rica.

3. Production standards:

Reglamento sobre la agricultura orgánica

4. Competent authority:

Servicio Fitosanitario del Estado, Ministerio de Agricultura y Ganadería, www.sfe.go.cr

5. Certification bodies:

Code number	Name	Internet address
CR-BIO-002	Kiwa BCS Öko-Garantie GmbH	www.bcs-oeko.com
CR-BIO-003	Eco-LOGICA	www.eco-logica.com
CR-BIO-004	Control unión Perú S.A.C.	www.cuperu.com
CR-BIO-006	Primus Labs. Esta	www.primuslabs.com
CR-BIO-007	Primus Auditing Operations de Costa Rica S.A.	www.primusauditingops.com

6. Body issuing certificate of inspection: as specified in Number 5.

7. Time limit for inclusion: by 31 December 2022.

EU Member States*1. Product categories:*

Product category	Code	Limitations
Unprocessed crop products	A	
Live animals or unprocessed animal product	B	With the exception of rabbits and unprocessed rabbit products.
Processed agricultural products for use as D food		With the exception of products whose organically produced ingredients contain products from rabbits, which were produced in the EU
Processed agricultural products for use as E feed		
Vegetative propagating material and seeds for cultivation	F	

2. Origin:

Products of categories A and F, which were produced in the EU, and products of categories D and E, which were processed in the EU with organic ingredients, which were produced in the EU or imported into the EU:

- a. either from Switzerland; or
- b. from a third country recognised under Article 33 (2), Article 38 (d) and Article 40 of Regulation (EC) No 834/2007⁸⁷ in conjunction with Annex III of Regulation (EC) No 1235/2008⁸⁸, provided this recognition applies to the product in question; or
- c. from a third country; the products must be certified by an inspection authority or inspection body recognised as equivalent by the EU in accordance with Article 33 (3) of Regulation (EC) No 834/2007 in conjunction with Annex IV of Regulation (EC) No 1235/2008, and this recognition must apply for the product category concerned and the geographical scope.

3. *Production standards:*

Council Regulation (EC) No 834/2007 of 28 June 2007

4. *Competent authority:*

European Commission, Agriculture Directorate-General, Unit H3

5. *Certification bodies:*

Inspection bodies or authorities laid down in Article 27 of Regulation (EC) No 834/2007.

6. *Body issuing certificate of inspection:* No certificate of inspection is required.

7. *Time limit for inclusion:* by 31 December 2022.

India

1. *Product categories:*

Product categories	Code	Limitations
Unprocessed crop products	A	
Vegetative propagating material and seeds for cultivation	F	

2. *Origin:*

Products of categories A and F that have been grown in India.

⁸⁷ Council Regulation (EC) No 834/2007 of 28 June 2007 on organic production and labelling of organic products and repealing Regulation (EEC) No 2092/91, OJ. L 189 of 20.7.2007, p. 1; last amended by Regulation (EU) No 517/2013, OJ. L 158 of 10.6.2013, p. 1.

⁸⁸ Commission Regulation (EC) No 1235/2008 of 8 December 2008 laying down detailed rules for implementation of Council Regulation (EC) No 834/2007 as regards the arrangements for imports of organic products from third countries, OJ. L 334 of 12.12.2008, p. 25; last amended by Implementing Regulation (EU) 2017/1473, OJ. L 210 of 15.8.2017, p. 4-13.

3. Production standards:

Israel

1. Product categories:

Product categories	Code	Limitations
Unprocessed crop products	A	
Processed agricultural products for use as food	D	With the exception of livestock products, or their processing products.
Vegetative propagating material and seeds for cultivation	F	

2. Origin:

Products of category A and F that have been grown in Israel and products of category D processed in Israel with organically grown ingredients that have been grown in Israel or that have been imported into Israel:

- a. either from Switzerland; or
- b. from a third country according to this Annex.

3 Production standards:

Law for the Regulation of Organic Produce, 5765-2005, and its relevant Regulations.

7. *Time limit for inclusion:* by 31 December 2022.

New Zealand

1. Product categories:

Product categories	Code	Limitations
Unprocessed crop products	A	
Live animals or unprocessed animal product	B	
Processed agricultural products for use as food ¹	D	.
Vegetative propagating material and seeds for cultivation	F	

¹ Yeast not included

2. Origin:

Products of category A, B and F that have been grown in New Zealand and products of category D processed in New Zealand with organically grown ingredients that have been grown in New Zealand or that have been imported into New Zealand:

- a. Switzerland; or
- b. a third country recognised under this Annex; or
- c. a third country whose production and inspection regulations have been recognised as being equivalent to the MPI «Food Official Organic Assurance Programme» on the basis of the guarantees and information provided by the competent authorities of the country in question in accordance with the provisions laid down by the MPI. Only organically produced ingredients which

are intended to be contained in the products of the category C processed in New Zealand with a maximum percentage of 5% of the products of agricultural origin may be imported.

3. Production standards:

MPI Official Organic Assurance Programme Technical Rules for Organic Production

*Annex 4a*⁸⁹
(Art. 4a)

List of Recognized Certification Bodies and Inspection Authorities outside the list of countries

1 Introduction

Product categories

The product categories shall be identified by the following codes in accordance with Regulation (EC) 1235/2008⁹⁰:

Product categories	
Unprocessed crop products	A
Live animals or unprocessed animal products	B
Aquaculture ¹	C
Processed agricultural products for use as food ¹	D
Processed agricultural products for use as feed	E
Vegetative propagating material and seeds for cultivation	F

¹ In accordance with Article 1 paragraph 3 of the Organic Farming Ordinance, aquaculture is not included within the scope of this provision.

2 List

A CERT European Organization for Certification S.A.

1. *Address:* 2 Tilou Street, 54638 Thessaloniki, Greece

2. *Internet address:* www.a-cert.org

3. *Countries, Code numbers and Product categories:*

Country	Code number	Product category

*Annex 5*⁹¹
(Art. 4a para. 1)

Species-specific requirements for livestock production

The requirements of the RAUS-Programme of the Ordinance on Direct Payments of 23 October 2013⁹² (DZV) must be complied with. The requirements apply *mutatis mutandis* to animals of the goat and sheep species which do not fall under Article 73 letter c and d of the DZV.

1 Free range areas and livestock housing

11 General principles

1. The numbers of livestock kept on grazing must be low enough to prevent overgrazing.
2. Housing, pens, equipment and utensils must be properly cleaned and disinfected to prevent cross-infection and the build-up of disease carrying organisms. Only the products listed in Annex 8 can be used for the elimination of insects and other pests in buildings and other installations where livestock is kept.
3. Outdoor runs and outdoor climate areas must be equipped and managed in such a way that the environment, in particular surface waters and groundwater, is not endangered.

12 Mammals

1. Calves, lambs and goats shall not be kept in individual boxes if the animals are more than one week old.
2. Porcine species shall be kept in groups, except during the rutting season (maximum 10 days), a few days before farrowing and during the suckling period. Piglets shall not be kept in flat deck systems or cages. Free range areas must be provided to allow the animals to excrete and root. Various materials may be used for rooting.

⁹¹ Inserted by No II of the EAER O of 23 Aug. 2000 (AS 2000 2508). Revised by No II para. 1 of the EAER O of 9 Nov. 2005 (AS 2005 5531), No I of the EAER O of 26 May 2008 (AS 2008 2907), No I para. 1 of the EAER O of 12 Nov. 2008 (AS 2008 5829), No III para. 1 of the EAER O of 31 Oct. 2012 (AS 2012 6357) and No III para. 2 of the EAER O of 1 Sept. 2016, in force since 1 Oct. 2016 (AS 2016 3183).

⁹² SR 910.13

13 Poultry

1. Buildings for poultry must meet the following minimum conditions:
 - a. at least one third of the floor area (accessible area) must be solid, that is not of slatted or of grid construction. It must be covered with sufficient litter material;
 - b. guinea fowl must have perches of at least 20 cm per bird;
 - c. each poultry house must not contain more than
 - 4800 broilers
 - 3000 laying hens
 - 5200 guinea fowl
 - 4000 female Muscovy or Peking ducks
 - 3200 male Muscovy or Peking ducks
 - 3200 other ducks
 - 2500 geese or turkeys;
 - d. the total usable area of poultry houses for meat production on any single production unit must not exceed 1,600 m².
2. The stocking density in housing shall be no more than 5 birds per m² of permanently accessible area for laying hens and no more than 20 kg live weight per m² for fattening poultry in fixed housing. For turkeys, the maximum stocking density between the 1st and 6th week of life shall be 30 kg and thereafter 36.5 kg live weight per m².
3. The grazing area shall be 5 m² for each laying hen, 10 m² for each turkey including an area of shade at least 1/3 m² and for each broiler 2 m², if necessary divided into several pens.
4. An individual nest shall be available for every 5 laying hens, or 100 cm² nesting area per bird for group nesters.
5. ...
6. A stock inspection shall be carried out for more than 50 birds.
7. In the case of laying hens natural light may be supplemented by artificial means (no low frequency lighting) to provide a maximum of 16 hours light per day with a continuous nocturnal rest period without artificial light of at least eight hours.
8. In housing and free range areas, turkeys must be able to carry out activities such as «plucking».
9. Water fowl must have access to a stream, pond or lake whenever the weather conditions permit.
10. Poultry must have access to outdoor runs for at least one third of their life as far as weather conditions permit.

2 Animal feeding

1. The daily ration for pigs shall contain roughage, fresh or dried fodder, or silage.
2. During the suckling period, piglets shall be given daily rooting earth or other comparable products.
3. The percentage of fodder ingredients not produced organically may be up to 35 per cent of the total feed ration of pigs, measured as dry substance, provided dairy waste is used.
4. The products listed in Annex 7 Section B 1a and k may be used as additives in silage production.
5. In order to meet the nutritional requirements of livestock, the products listed in Annex 7 Section A 1 (animal feed materials of mineral origin), section B 3a (vitamins and provitamins) and section B 3b (trace elements) may be added.
6. The products listed in Annex 7 Section B 1b (antioxidant agents), Section B 1g i (binders and anti-caking agents), Section B 2b (flavourings), and in Category 4 (zootechnical additives) may be used for animal feeding for the purposes listed with reference to the aforesaid categories.
7. Feedingstuffs, feed materials, compound feedingstuffs, feed additives, processing aids used in feedingstuffs and certain products used in animal nutrition shall not be produced using genetically modified organisms or derivatives thereof nor shall they contain them.

*Annex 6*⁹³
(Art. 4a para. 2)

Requirements laid down for outdoor runs and outdoor climate areas

1. Outdoor runs for animals of the bovine species and water buffaloes, sheep and goats (milk and meat production)

The requirements laid down in Annex 6, letter E, paragraph 3, 4 and 5 of the DZV⁹⁴ must be complied with. The requirements apply *mutatis mutandis* to animals of the goat and sheep species which do not fall under Article 73 letter c and d of the DZV.

2. Total area for animals of the pig species

The requirements for outdoor runs laid down in Annex 6, letter E, paragraph 6 of the DZV must be complied with.

Animals	Total area (pen and outdoor run) at least ...m ² /animal
Non-suckling breeding sows	2,8
Breeding boars	10
Best-developed females for next breeding cycle and fattening pigs over 60 kg	1,65
Best-developed females for next breeding cycle and fattening pigs under 60 kg	1,10
Weaned piglets	0,80

3. Outdoor climate areas for productive poultry

The requirements laid down in Annex 6, letter B of the DZV must be complied with.

⁹³ Inserted by No II of the EAER O of 23 Aug. 2000 (AS 2000 2508). Amended by No III para. 2 of the EAER O of 1 Sept. 2016, in force since 1 Oct. 2016 (AS 2016 3183).
⁹⁴ SR 910.13

Annex 7⁹⁵
(Art. 4b par. 1 lett. b and c)

Animal feed materials and animal feed additives

Section A Animal feed materials

1. Animal feed materials of mineral origin

- Calcareous shelly sand
- Calcareous marine algae (Maerl-Kalk)
- Lithotamnium
- Calcium gluconate
- Calcium carbonate
- Magnesium oxide (anhydrous magnesia)
- Magnesium sulphate
- Magnesium chloride
- Magnesium carbonate
- Defluorinated monocalcium phosphate
- Defluorinated dicalcium phosphate
- Calcium magnesium phosphate
- Magnesium phosphate
- Monosodium phosphate
- Calcium sodium phosphate
- Sodium chloride
- Sodium bicarbonate
- Sodium carbonate
- Sodium sulphate
- Potassium chloride

2. Other animal feed materials

Products and by-products of the fermentation of microorganisms whose cells have been deactivated or killed:

⁹⁵ Inserted by No II of the EAER O of 23 Aug. 2000 (AS **2000** 2508). Amended by No III para. 2 of the EAER O of 31 Oct. 2012 (AS **2012** 6357). Revised by No II para. 2 of the EAER O of 29 Oct. 2014 (AS **2014** 3979) and No III para. 2 of the EAER O of 1 Sept. 2016, in force since 1 Oct. 2016 (AS **2016** 3183).

- *Saccharomyces cerevisiae*
- *Saccharomyces carlsbergiensis*

Section B Animal feed additives

All additives are subject to the requirements of the Ordinance on Animal Feedingstuffs of 26 October 2011⁹⁶. The categories and function groups are taken from Annexes 2 and 6.1 of the Feedingstuffs Book Ordinance of 26 October 2011⁹⁷.

Category 1 Technological additives

Function group: a) Preservatives:

Code	Category/ function group	Substance	Description, conditions for use
E 200	1a	Sorbic acid	
E 236	1a	Formic acid	
E 237	1a	Sodium formate	
E 260	1a	Acetic acid	
E 270	1a	Lactic acid	
E 280	1a	Propionic acid	
E 330	1a	Citric acid	

Function group: b) Antioxidant agents:

Code	Category/ function group	Substance	Description, conditions for use
E 306(i)	1b	Tocopherol extracts from vegetable oils	
E 306 (ii)	1b	Tocopherol-rich extracts from vegetable oils (delta rich)	

Function group: g) Binders and i) Anti-caking agents:

Code	Category/ function group	Substance	Description, conditions for use
E 535	1	Sodium ferrocyanide	Maximum content: 20 mg/kg NaCl (calculated as ferrocyanide anion)
E 551b	1	Colloidal silicon dioxide	
E 551c	1	Kieselgur (purified diatomaceous earth)	
1m558	1	Bentonite	
E 559	1	Kaolinite clays, asbestos free	

⁹⁶ SR 916.307

⁹⁷ SR 916.307.1

Code	Category/ function group	Substance	Description, conditions for use
E 560	1	Natural mixtures of steatites and chlorite	
E 561	1	Vermiculite	
E 562	1	Sepiolite	
E 566	1	Natrolite-phonolite	
1g568	1	Klinoptilith of sedimentary origin	
E 599	1	Perlite	

Function group k) Silage additives:

Code	Category/ function group	Substance	Description, conditions for use
	1k	Enzymes and micro-organisms	Use restricted to production of silage when weather conditions do not allow for adequate fermentation.

Category 2 Sensory additives

Function group: b) Flavourings

Code	Category/ function group	Substance	Description, conditions for use
	2b	Flavourings	Only extracts from agricultural products

Category 3 Nutritional additives

Function group: a) Vitamins, pro-vitamins and chemically well-defined substances having similar effect

Code	Category/ function group	Substance	Description, conditions for use
	3a	Vitamins and provitamins	<ul style="list-style-type: none"> – obtained from agricultural products – if obtained synthetically, only those which are identical to vitamins obtained from agricultural products may be used for monogastric animals – if obtained synthetically, only vitamins A, D and E, which are identical to vitamins obtained from agricultural products may be used for ruminants

Function group: b) Trace elements

Code	Category/ function group	Substance	Description, conditions for use
E1 Iron	3b	– Ferric oxide – Ferrous carbonate – Ferrous sulphate, heptahydrate – Ferrous sulphate, monohydrate	
E2 Jodine	3b	– Potassium iodide – Calcium iodate, anhydrous – Coated granulated calcium iodate anhydrous	
E3 Cobalt	3b	– Cobalt(II) acetate tetrahydrate – Cobalt(II) carbonate – Cobalt(II) carbonate hydroxide (2:3) monohydrate – Coated granulated cobalt(II) carbonate – Cobalt(II) sulphate heptahydrate	
E4 Copper	3b	– Basic cupric carbonate, monohydrate – Cupric oxide – Cupric sulphate, pentahydrate – Dicopper chloride trihydroxide (TBCC)	
E5 Manga- nese	3b	– Mangan(II)-carbonat – Manganoxid – Mangan(II)-sulfat, Monohydrat	
E6 Zinc	3b	– Zinc oxide – Zinc sulphate monohydrate – Zinc sulphate heptahydrate – Zinc chloride hydroxide monohydrate (TBZC)	
E7 Molyb- denum	3b	– Sodium Molybdate	
E8 Selenium	3b	– Sodium selenite – Sodium selenate Selenium in organic form from <i>Saccharomyces cerevisiae</i> (sele- nised yeast inactivated)	

Category 4 Zootechnical additives

Code	Category/ function group	Substance	Description, conditions for use
	4a, 4b, 4c, 4d	Enzymes and microorganism in the category of Zootechnical additives	

Annex 8⁹⁸
(Art. 4c)

Pure substances for cleaning and disinfection of livestock buildings and installations (e.g. equipment and utensils)

1. Authorised substances

- Potassium and sodium soap
- Water and steam
- Milk of lime
- Sodium hypochlorite (e.g. as liquid bleach)
- Caustic soda
- Caustic potash
- Hydrogen peroxide
- Natural essences of plants
- Citric, peracetic, formic, lactic, oxalic and acetic acid
- Alcohol
- Nitric acid (dairy equipment)
- Phosphoric acid (dairy equipment)
- Formaldehyde
- Sodium carbonate
- Quicklime
- Lime

2. The following are also authorised:

- Iodine-based products as disinfection products for teats
- Products for cleaning and sterilization of dairy utensils, which are authorised in the list of biocidal products for cleaning and sterilization of milking machines⁹⁹.

⁹⁸ Inserted by No II of the EAER O of 23 Aug. 2000 (AS **2000** 2508). Revised by No II para. 1 of the EAER O of 27 Oct. 2010, in force since 1 Jan. 2011 (AS **2010** 5863).

⁹⁹ The list of notified active ingredients can be obtained for a fee from the Anmeldestelle für Chemikalien, 3003 Bern, or downloaded free of charge from the Internet address www.cheminfo.ch.

Annex 9¹⁰⁰
(Art. 16c and 16f)

**Section A:
Certificate of inspection for the import of products
from organic production**

**Swiss Confederation
Certificate of inspection for the import of products from organic production**

1 Issuing certification body or authority of the country of origin (name, address and code number)	2. Import under: Organic Farming Ordinance, Article 23 (list of countries) <input type="checkbox"/> <input type="checkbox"/> Organic Farming Ordinance, Article 23a (list of recognized certification bodies and inspection authorities) <input type="checkbox"/>	
3. Serial number of the certificate of inspection	4. Exporter (name and address)	
5. Producer or processor of the product (name and address)	6. Control body or control authority (name, address and code number)	
7. Country of origin	8. Country of export	
9. Country of clearance/ Point of entry	10. Country of destination	
11. Importer (name, address and EORI number)	12. First consignee in Switzerland (name and address)	
13. Declared quantity in relevant units Tariff heading Trade name Number of packages Lot number Net weight		
14. Container number	15. Customs seal number	16. Total gross weight

¹⁰⁰ Inserted by No II para. 3 of the EAER O of 25 Nov. 2002 (AS 2002 4292). Amended by No II para. 2 of the EAER O of 18 Oct. 2017, in force since 1 Jan. 2018 (AS 2017 6349).

17. Means of transport before point entry into Switzerland	
Mode	
Identification	
International transport document	
18. Declaration of control authority or control body issuing the certificate referred to in box 1	
This is to certify that this certificate has been issued on the basis of inspections in accordance with Article 16d paragraph 1, and that the products have been produced in accordance with the provisions of the Organic Farming Ordinance or Regulation (EC) No 834/2007 ¹⁰¹ .	
Date:	
Name and signature of authorised person	
Stamp of issuing authority or body	
19. Customs warehousing <input type="checkbox"/>	Inward processing <input type="checkbox"/>
Name and address of operator	
Certification body or authority (name, address and code number)	
Customs Declaration Reference Number for customs warehousing or inward processing	
20. Inspection of the consignment by the competent Swiss certification body	
Import registration (customs receipt number, date of import and customs office of customs declaration)	
Date:	
Name and signature of authorised person	Stamp

¹⁰¹ Council Regulation (EC) No 834/2007 of 28 June 2007 on organic production and labelling of organic products and repealing Regulation (EEC) No 2092/91, OJ. L 189 of 20.7.2007, p. 1; last amended by Council Regulation (EC) No 967/2008 of 29 Sept. 2008, OJ. L 264 of 3.10.2008, p. 1.

21. Declaration of the first consignee	
This is to certify that the goods have been accepted in accordance with Annex 1 figure 8.5 of the Organic Farming Ordinance.	
Name of the company	Date
Name and signature of the authorised person	

Section B: Extract of the certificate of inspection

Swiss Confederation

Extract No of the certificate of inspection

1. Certification body or authority having issued the underlying certificate of inspection (name, address and code number)	2. Import under: Organic Farming Ordinance, Article 23 (list of countries) <input type="checkbox"/> Organic Farming Ordinance, Article 23a (list of recognized certification bodies and inspection authorities) <input type="checkbox"/>
3. Serial number of the underlying certificate of inspection	4. Operator having split the original consignment into batches (name and address)
56. Inspection body or authority (name, address and code number)	6. Name and address of the importer of the original consignment
7. U. Country of origin of the original consignment	8. Country of export
9. Country of clearance/Point of entry	10. Country of destination
11. Consignee of the batch obtained from splitting (name and address)	
12. Description of products	
Tariff heading	Number of packages
Net weight of the batch and net weight of the original consignment	

13. Declaration of the competent certification body

This certificate extract is valid for the batch described above which results from the splitting of a consignment which is covered by an original certificate of inspection with the serial number given in box 3.

Date:

Name and signature of authorised person

Stamp

14. Declaration of the consignee of the batch

This is to certify that the batch has been accepted in accordance with Annex 1 figure 8.5 of the Organic Farming Ordinance.

Name of the company

Date:

Name and signature of the authorised person

*Annex 10*¹⁰²
(Art. 16*i*)

List of seeds available in sufficient quantities

No entry to date.

¹⁰² Inserted by No II para. 3 of the EAER O of 26 Oct. 2003, in force since 1 Jan. 2004 (AS **2003** 5357).

*Annex II*¹⁰³

¹⁰³ Inserted by No II para. 3 of the EAER O of 18 Nov. 2009 (AS **2009** 6337). Repealed by No II para. 2 of the EAER O of 27 Nov. 2010, with effect from 1 Jan. 2011 (AS **2010** 5863).

Certification body	Number of noted irregularities or infringements(1)				Number of measures in relation to the non-compliant party or product(2)				Number of measures against the operator(3)						
	Agricultural producers*	Processors**	Importers	Exporters	Other operators***	Agricultural producers*	Processors**	Importers	Exporters	Other operators***	Agricultural producers*	Processors**	Importers	Exporters	Other operators***

(1) Only irregularities and infringements which affect the organic status of products and/or have led to a measure being taken.

(2) When an irregularity concerning compliance with the provisions of this Ordinance is established, where the certification body ensures that no reference to organic production occurs in the labelling and advertising for the whole of the party or product affected by the irregularity.

(3) When a serious infringement or an infringement with long-term effects is established, where the certification body prohibits the operator in question from marketing products with a reference to organic production in the labelling and advertising for a period agreed with the authority responsible for enforcement. «Agricultural producers» include producers that are producers only, producers that are also processors, producers that are also importers and other mixed producers not elsewhere classified.

** «Processors» include processors that are processors only, processors that are also importers and other mixed processors not elsewhere classified.

*** «Other operators» include traders (wholesalers, retailers) and other operators not elsewhere classified.
